

Next Meeting

On February 1st we shall be holding our annual film show, an event which has been arranged by Brian, G8JAU. There will be four films about Gas, covering the history of gas production from the old gas works to the North Sea platforms. The venue will be the same as usual; Marconi College, Arbour Lane, Chelmsford beginning at 7:30 pm.

Committee Meeting

Wednesday 19th February, 7:30 pm., Wheatsheaf, New Street.

Charlie

Those who were not present at the last meeting will be saddened to hear that Charlie, our tea-maker and arranger of chairs has been taken ill and will be unable to carry on since he not can not drive his car. Those who set out the chairs and put them away last month will realise how much work Charlie has put in over the years and how grateful we are to him. I trust members will realize how fortunate we are to use such excellent facilities for our meetings and will assist the nominated members of the committee in leaving the lecture room as tidy as we find it after all meetings.

NFD

The first meeting of the National Field Day committee was held on January, 19th. It was decided to enter on the same basis as last year but a promising new site is being investigated. The construction of cubical quad antenna is being investigated and anyone who knows where to obtain 15 foot bamboo poles should contact Barry G3WFF, Mike G3ZWW or Keith G3WSN as soon as possible. As always we need good contest operators, if you think you're good enough or can press someone else who is, please tell Les G4CUT.

TV Lecture

Jeremy's lecture which was arranged for March 1st has now been put back to April 5th. The plea for equipment in the last newsletter still applies and anyone who can help with 70cm and 2m beams plus feeders should contact Les. Many thanks to those members who have offered equipment.
